STATIC CORRIDOR FOR SOLES CLEANING WITH DISINFECTANT NEBULIZATION

Designed for soles cleaning with fixed brushes without use of water. It allows the nebulization of disinfectant on soles.

It is appropriate in dry spaces where water is not suitable for cleaning.

Disinfectant nebulization is actionned by the operator weight, when he walks on the brushes on the basement.

Nebulization time is determined by the stop time of the operator who is cleaning its soles.

Lower pull-out container for collecting dirt and soles residues is present.

Two handrails allow a user-friendly support during the cleaning process.

Setup location is recommended at the work division entrance to prevent contamination in hazard-prone areas.

Compressed air supply required

Technical characteristics

dimensions	70x51x115 height cm
supply	compressed air supply 6 bar
brushes	n. 5
material	entirely in stainless steel
